

## **RESOLUTION №2**

### **Need for a comprehensive and common approach to the single market**

1. We believe that the old perception of the single market should be supplemented in order to extend its scope; all those involved in shaping and implementing the single market need to adopt a more holistic approach, fully integrating interests of home producers;
2. We emphasize that a stronger, deeper and expanded single market is vital for growth and job creation;
3. We emphasize that the single market should be central in achieving the goal of a sustainable and highly competitive social market economy in the context of long-term vision of the strategy of HounNet Eastern Europe;
4. We consider that the single market is an essential prerequisite for the success of the network; therefore we propose that any strategy and policies for reviving the single European market should be coordinated by partner organizations and be based on a pragmatic, comprehensive and wide-ranging deal supported by all partners and focusing mainly on priorities that homeworkers manufacturers will truly take ownership and which they will implement effectively at national, regional and local level;
5. We stress that the single market should provide benefits for consumers in terms of better quality, greater variety, reasonable prices, and safety of goods and services;
6. We call for a new paradigm of social thinking, focusing on citizens, consumers and SMEs in the relaunch of the single market; we believe this can be achieved by outworker producers who must be placed at the heart of development policies HNIE;
7. We demand that the revitalization of the single market requires effective implementation of more adequate checks and balances, and more dialogue, in order to ensure adequate

consideration of the needs of citizens and consumers; we believe that an evidence-based and citizen-based approach will help home-based workers to win public confidence and to find the right formula for the adoption of initiatives to give HNIE the competitive edge we need;

8. We declare again that a meaningful assessment of the effects of the single market for social, consumer, environmental and economics - which should feature in all single market proposals - is crucial for gaining public confidence and will also provide realistic integration in terms of social, consumer protection, the environment and the economy;

9. We consider that the abolition of borders in the single market will further increase the competitiveness of HNIE in a globalized world
